Everything you need to know about

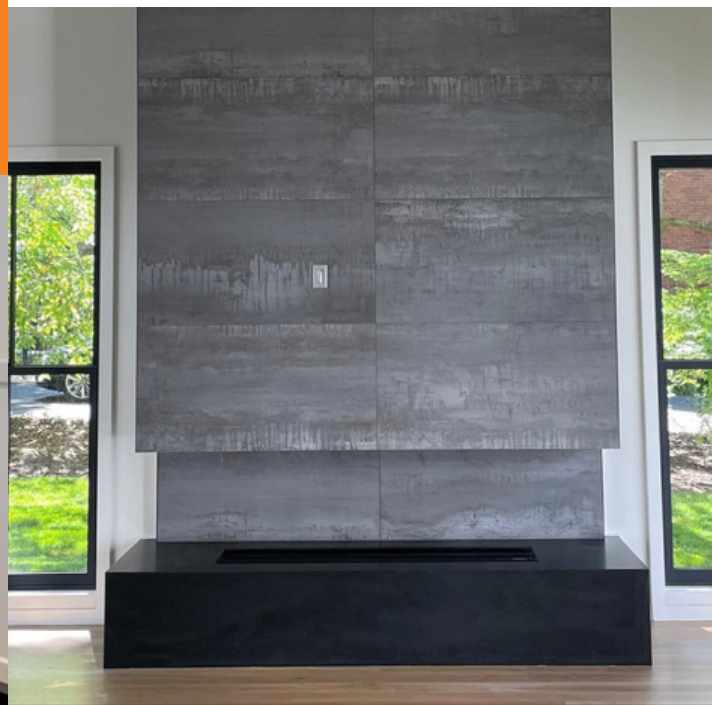
Granite

Onyx
Granite

Granite is the hardest natural stone for home decor, inside and outside. Granite countertops exude classic elegance while also offering outstanding durability. When you choose granite, you choose the last set of countertops your home will ever need. With proper care and maintenance, your granite countertops will deliver the same look and performance for decades to come.

onyx MARBLE & GRANITE

Our granite is classed by the thicknesses, color, veins, the country where it was quarried, and rarity.



Granite

Care & Maintenance

Characteristics

Heat Resistant

Scratch Resistant

Easy to clean

Highly durable

- Needs to be sealed to protect it from stains at least once a year. Avoid chemical-based cleaners, they can damage the sealant.
- White granite countertops may need sealing more frequently than darker colors, because they are more likely to show stains.
- Use a soft cloth to dust the surface, or wipe it down with water or a mild soap.
- For an extra cleaning, use a stone cleaner with a neutral pH.
- Oily stains may be removed by applying mixed baking soda and dish soap.
- **NEVER** use abrasive cleansers or hash chemicals.

Quartz

Onyx

Quartz

Quartz is a man-made stone composed of quartz resin, long-lasting and easy to maintain. Quartz has eye-catching colors and looks. You can find everything from fire-engine red to apple green, browns, blacks, creams, and everything in between. Many designs even include recycled glass or metallic flecks to add extra interest and beauty.

Our quartz is available in different thicknesses, many colors and finishes.

Quartz

Care & Maintenance

Characteristics

Water Resistant

Many color options

Easy to clean

Durable

- No need to be sealed, it is stain resistant.
- Cleaning: use soap, water and a soft cloth or paper towel.
- Abrasive cleansers or cleansers that contain bleach **should not** be used with quartz.
- Quartz can be damaged by direct exposure to heat. Use heating pads when you need to put hot pots or pans on it.
- Polished quartz needs to be cleaned gently to maintain the shinny surface.
- Avoid using metal knives and utensils directly on the countertop. Metal may scratch the quartz.
